

*Seminar:* "Geometry&Physics@DFT"

*Location:* seminar room DFT (IFIN-HH),  
(<http://events.theory.nipne.ro/gap/index.php/seminar>)

*Date:* Friday, December 6, 2013, 12 am

*Title:* **Recent results in locally conformally Kaehler geometry**

*Speaker:* **Prof. Liviu ORNEA**

(Professor at the Department of Mathematics, University of Bucharest, and Senior Researcher I at IMAR)

*Abstract:* "After recalling some basic aspects of the geometry and topology of locally conformally Kaehler manifolds and giving some (counter)examples, I describe some recent results regarding blow-ups of such manifolds."
